## Two Manhattan Strikes.

Two great strikes have settled the future of Manhattan as a remarkable gold group. The first was made last week on the property of the Manhattan Consolidated Mining company and ran \$1 a pound or \$2000 to the ton. The second strike, and one of equal importance to the camp, is the wonderful finding just made on the Annie Laurie claim of the Manhattan Mining Company of Nevada, where ore panning 25 cents to every panning made from less than half pound of ore was found in a streak eighteen inches wide. This means a valuation of over \$10000 to the ton.

## Hogging Nevada Fishing Ground

The San Francisco Fly Casting club, which has purchased land on both sides of the Truckee river between Prosser and Martin's rock, which it will convert a large game and fishing preserve, repeats the claim that it proposes to control absolutely that section of the stream. As the preserve claimed is the best fishing ground on the Truckee it is not likely that Nevada anglers will submit to being barred from luring troutlets from their lairs in that part of the stream.

In describing a function at a leading Bath hotel, the reporter said: "The chamberlains were hung with smiles and handsomely dressed women, and men passing under looked up with interest."

The services in the Presbyterian church for Sunday will be postponed until further notice, owing to the unavoidable absence of the pastor. The prayer meeting will be held as usual.

## BIG LEGAL BATTLE.

Mining Suit Involving \$1,000,000 to be Fought Out at Tonopah.

Attorney W. S. Wall of the firm of Smith & Wall leaves this morning for Tonopah where a mining suit of great significance comes up before Judge Breen, involving title to sixty-three claims in the Bullfrog district.

The suit is brought by J. Otis Johnson and among the defendants are H. H. Clark, millionaire pioneer in the Bullfrog country, estate of George W. Ladd, George S. Nixon, Bullfrog Mining Company, Bullfrog Mizzpah Company, Bullfrog Midway, Bert L. Smith and others.

The story of the suit as told in the voluminous papers already filed goes back to 1904, when, it is alleged, a grub stake combination, consisting of Zeb Kendall, H. H. Clark, J. Otis Johnson and G. W. Ladd, was formed and Johnson and Ladd went into the Bullfrog country, according to the terms of the alleged agreement, to prospect for the party.

It is claimed that in August, 1904, the two prospectors quit their job and for a time worked for themselves, later in the same month they resumed

As though still further to complete the story of the suit, it is alleged that the two prospectors, Johnson and Ladd, were joined in a partnership in the fall of 1904.

The alleged partnership was a partnership in the Bullfrog country, and Johnson and Ladd were joined in a partnership in the fall of 1904.

The defendants claim that Johnson and Ladd continued the prospecting and located the sixty-three claims which are now the subject of the litigation. All of these locations were made, it is claimed, in the names of Johnson, Clark and Ladd, and that Johnson stated to many when on his way back to Tonopah, that he had nothing further to do with the grub stake combination, which up to that time, it is alleged, had not acquired any claims which are included in the sixty-three.

Within about seven months Kendall and Johnson commenced action for a one-fourth interest in the claims. Three weeks ago the case, so far as Kendall was concerned was compromised and he withdrew from the litigation. Johnson declined to compromise and the present suit is to re-open a fourth interest in these mines said to be worth about \$1,000,000.

Another angle to the suit is that many of the defendants claim they are purchasers of the property without notice.

The suit is of interest, as showing what an entanglement can arise from "grub-stake" propositions where every thing is not put down in "black and white" signed and acknowledged and then made binding.

Attorney Wall, in discussing the matter yesterday, stated: "As long as the claims located are of no particular worth, there is, of course, no difficulty, but when such mines as those at Bullfrog are located and their great values become known it is an invitation for litigation.—Journal.

## By Traction From Carson.

It is rumored that a big traction engine will be put on the road between Bodie and Carson about the first of June and haul freight for half a cent per pound. Considering Moyle Bros' reduction in prices and the reduction in freight it will be a cheap place to live.—Bodie Miner.
